

A freestanding and cost efficient solution for grain storage.

Height	2440mm	3050mm
Length	1220mm	1200mm
Depth	1220mm (at base)	1220mm (at base)
Weight	2.84 tonnes	3.02 tonnes

## Summary

Designed for grain walling, waste separation and bulk storage the Taperbloc™ XL can be double loaded and is easily manoeuvred with the cast-in forklift tine holes. This means that no specific lifting attachments are required and it can be installed without the need to be ground fixed.

Although designed to be freestanding the units can be connected together.

We are able to supply corners to cater for your specific needs allowing you to create storage bays for grain/crops, silage clamps, aggregate bays, waste management and many more applications.

- Freestanding
- Ideal for grain walling, waste separation, bulk storage, recycling materials
- No protruding toe makes access to stored material easier
- Easy to manoeuvre and reconfigure to change structure
- Can be loaded from both sides
