

Marquee Ballast Blocks

Standard and bespoke options available to the events industry.

Summary

We offer a range of marquee ballast blocks in various weights which are perfect for securing marquees and other temporary structures for the Events industry. They are quick and easy to install.

The ballast blocks can be supplied with or without forklift pockets. We can also supply additional fixing

methods such as eye-bolts and cast-in holes for lifting hoops depending upon your requirements.

The blocks can also be supplied branded with your company name on them or can be plain (unmarked). This can be useful to promote your brand at the event and also lowers the risk of blocks going missing during the event breakdown.

The weight of the block can be imprinted onto the block, again making it easier for staff handling the blocks by forklift to assess risks.

The blocks are flat sided and do not interlock.

The edges of the blocks are chamfered which reduces damage during use.

A wide range of colours are also available (see below for examples).

	Type 1	Type 2	Type 3	Type 4	Type 5
Weight	100 kgs	160 kgs	500 kgs	1,000 kgs	2,000 kgs
Width (mm)	345	412	805	750	770
